

Demolition Drag Derby Car - Basic Design

2004

OPTIONS: -

Customize this design
Make it stronger!

Add Visual design features as desired

Protect the wheels with bumpers

Make a totally custom "new" design

See example pictures on the DDD website

NOTE: Refer to car spec sheet!!!!

Ideas or suggestions....

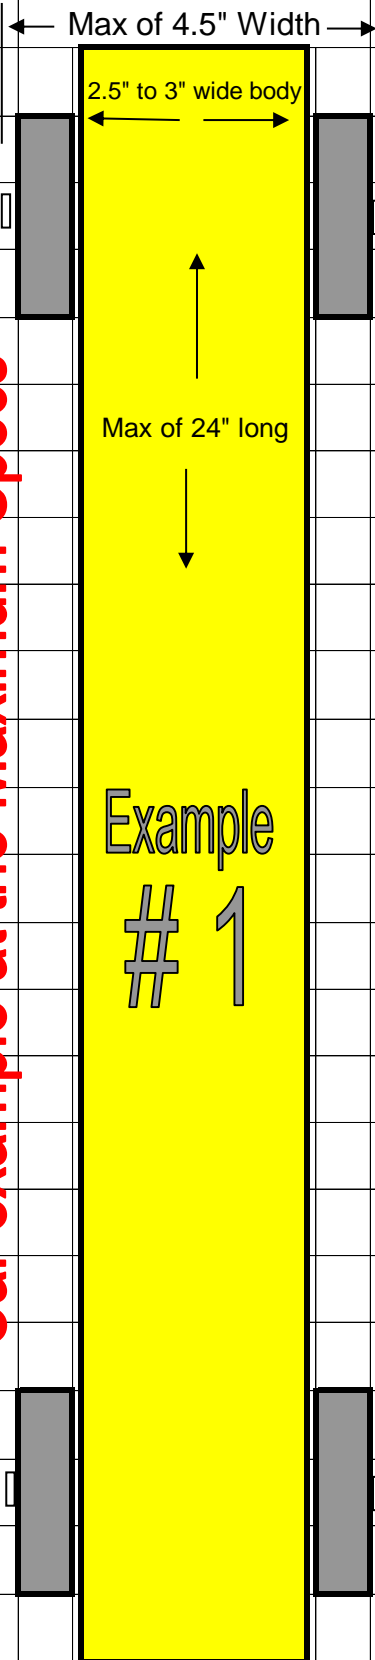

Wheels? Use a Hole Cutter bit in your drill and cut 3/4" thick Hard Wood into perfect circles. The center 1/4" bit is perfect for the axle
You can use a 2" or 3" or larger Hole Cutter bit.

Sand the edges of the wheels smooth.

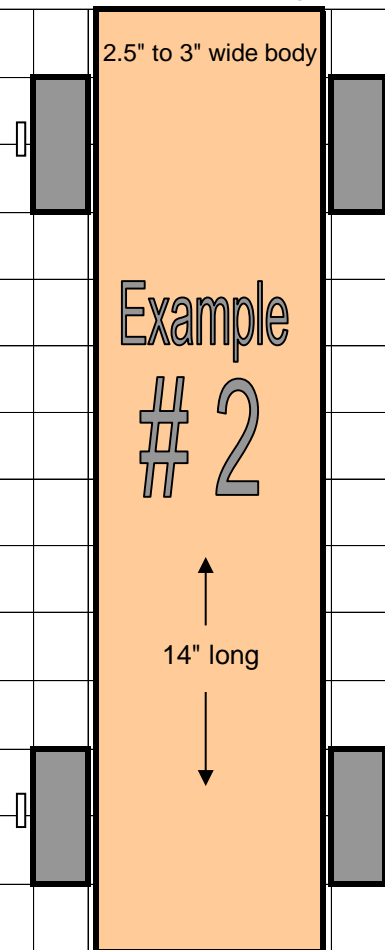

Axle? Use bolts, metal rod with cotter pins, etc.

It is recommended you use washers on the axles to reduce friction

Car example at the Maximum Specs

Smaller / Shorter Design Example
